

Project Submission Instructions

The sample solution (Dashboard) is already provided for your reference.
You need to re- create the **Dashboard** using the sales and working data.

Once finished, submit the new Excel file in **source code** from LMS.
In **screenshots**, submit a .jpeg or .png of the final dashboard.

*note - If LMS does not accept the **Excel file**, then attach or drag and drop the excel file in a new Microsoft word document (.doc) and submit the .doc file in both the fields.
